Wide opening hinges

IN ROOM SAFES

Do you need extra management control?

ANANT safe is conveniently equipped with audit trail function saving in memory the last 300 events (openings + closings).

✓ **USE.**

Your guests are going to be able to protect their valuables – conveniently and without having to take a key with them. Guests simply program in their personal code, and the locks are then moved by motor. When a new guest arrives in the room and programs his new code with the safe opened, the previous code is automatically deleted.

✓ **EMERGENCY OPENING**

If a guest forgets his code, or leaves the safe locked after checking out, or if any system failure occurs, your hotel has the MASTER CODE for EMERGENCY OPENING. The emergency lock is hidden by a removable magnet cover able to be customized with the logo brand. Includes a delayed opening for emergency openings of 1 to 9 minutes in order to guarantee the guest privacy. (programmable option).

✓ **AUDIT TRAIL FUNCTION**

Additionally, in order to improve the security and control of undesirable thefts, EASY PLUS safe is equipped with audit trail function. This option, save in memory the last 300 events made with user code, master and emergency key, (openings and closings).

All events are listed with exact time and date and can be printed by the mini-printer included.
